

PG&E's Recent Work to Serve Yountville

Feb 18, 2025

PG&E's Recent work

- PG&E installed a new circuit that feeds a majority of the Town of Yountville and the Veterans Home of California
- The new circuit is fed from a new substation transformer PG&E installed in 2023.
- More direct route to Yountville and Veterans Home along highway 29 instead of Silverado Trail
- 1.5 miles of conductor replaced with new larger conductor
- 1.7 miles of newly installed conductor and poles
- 0.4 miles of newly installed underground cable

Benefits to the Town of Yountville

- Increased capacity for the Town of Yountville to allow for growth in housing and businesses
- Possible alternate feed to the Town in the event there is an outage.
